MMX 150 wireless

Gaming Headset

DESCRIPTION

The MMX 150 wireless is perfect for social gaming, voice chats and music.

Due to the integrated high-quality 40 mm driver systems, the MMX 150 wireless offers a spatial sound image with clear localisation. The sound can be individually adjusted via the beyerdynamic app. Numerous EQ presets are also available for different game genres. Software updates are also available via the app.

The detachable META VOICE microphone with sidetone ensures a clear sound and control when speaking by allowing you to hear your own voice in the headset. Without the microphone, the MMX 150 wireless can be used for listening to music.

The MMX 150 wireless can be charged using the USB-C cable supplied. The total battery runtime is up to 50 hours.

LOW LATENCY MODE

The included USB dongle connects to your PC or any other USB device to minimise latency during gaming. There is no input lag between audio and video, ensuring an excellent gaming experience.

BLUETOOTH 5.3

In BLUETOOTH® MODE, the MMX 150 wireless can be connected to a smartphone or other Bluetooth®-enabled devices to enjoy music at home or on the go.
