Power supply:	12V / 12A DC
Dimensions:	365 x 60 x 420 mm (W x H x D)
Weight:	4 kg

CAUTION!

Due to the wide variety of vinyl formulations and the inability to determine the prior condition, treatment, or heat exposure history of individual vinyl records, Pro-Ject Audio Systems disclaims any and all liability for damage to records resulting from the use of the Flatten it device. This includes, but is not limited to, records that are new or unused, as the composition and integrity of the vinyl material cannot be independently verified by Pro-Ject Audio Systems.

While extensive internal testing has been conducted using a broad range of records and prolonged heat cycles—during which no damage was observed, and all tested records could be flattened—individual results may vary. It may also not be possible to successfully flatten each and every record, new or used, for the reasons stated above. Accordingly, the use of the Flatten it device is undertaken solely at the user's own risk. By using this product, the user accepts full responsibility and liability for any potential damage to their records.

Vinyl Record Flattening Machine

Restore your vinyl collection to its original glory with the Flatten it vinyl record flattening machine. Designed for audiophiles and collectors alike, this device repairs warped records and enhances your listening experience.

Flatten it is designed to restore your warped records with precision and care. It gently and safely flattens your vinyl, improving playback quality by eliminating skips, pops, and distortion. Compatible with all sizes and thicknesses of records, it features premium heated aluminium plates for even heat distribution, ensuring consistent results.

With precise temperature control and a low temperature hysteresis of just 2°C, you can trust that your records are being treated with the utmost attention. The easy-to-use machine boasts a solid aluminium construction, offering durability and long-lasting reliability.

Made in Europe, Flatten it is the perfect solution for vinyl enthusiasts looking to bring their collection back to life.
